

**ntX8000 series**

## **The IP PBX with Infinite Possibilities**

“NTEGRATOR presents the ntX8000 series, the IP PBX with Infinite Possibilities.”  
Integrated Communications for your business competitive advantage.

There has never been a more critical need for you to seriously look at your communication systems and gain that competitive advantage with NTEGRATOR's ntX8000 IP PBX.

### **Achieve BETTER Performance, GREATER Functionality at MINIMUM Cost**

Traditional PBX and Key Telephone System are now obsolete but you need not discard them. When you integrate the NTEGRATOR ntX8000 with your present system, a host of new features will make your organization more effective and productive. With Voice Mail and Auto Attendant, calls will be handled more efficiently to give your organization a professional image.

Our ntX8000 opens up Infinite Possibilities with seamless integration of your telecommunication needs and computer applications. That means by the time you pick up your telephone, you will already know who is on the line and relevant information about your customer will be on your computer screen.

The best part of our ntX8000 is that you can achieve substantial savings on your long distance calls. With IP telephony, long distance telephone charges can be bypassed using IP gateways. Organizations with multiple branches will enjoy immediate savings when telephone calls are connected through the Internet.

***Get connected to Infinite Possibilities with  
NTEGRATOR ntX8000 IP PBX.***
